

Software Engineering Intern

Remote / Somerville, MA

Founded in 2014, Owl Labs is one of the fastest-growing tech startups in Boston. The environment at Owl Labs has been shaped by the top tech, marketing, and sales talent leading it. We share a strong culture of support, learning, and collaboration. Embodying empathy for the remote worker or team, a love of emerging technology, and hustle and grit, the Owl Labs team is shaping the future of work every day. From leadership to our co-op interns, we encourage creativity, breaking the mold, moving fast to learn quickly, and then adapting. We are a culture of trying new things to stay ahead in the marketplace and embracing new ideas at every level. We embrace remote work every day with over 40% of employees working remotely (pre-COVID). The Meeting Owl products contribute directly to our company's success; it is at the core of who we are and what we do.

We're best known for the Meeting Owl product line, a smart 360° camera, mic, speaker all-in-one solution. Our award-winning product, the Meeting Owl Pro, has been recognized by CES Innovation Awards. We're best known for the Meeting Owl product line, a smart 360° camera, mic, speaker all-in-one solution. 2020, Red Dot Design Awards 2020, SXSW Innovation Awards 2020, and our team recognized as an Inc. Best Workplaces 2020 and the esteemed Inc.'s Editor's List.

Interning at Owl Labs:

We are seeking a Software Engineering Intern to join our development team. The ideal candidate has experience with computer programming, a general curiosity for science and math, and a passion for solving problems. Bonus if you have a "maker" mindset and have written code for any hardware devices like Arduino or Raspberry Pi. Double bonus if you've participated in an Open Source project.

In this role, you will impact some of the company's most crucial product development goals, always with the customer's needs top of mind. You will receive mentorship both one-on-one with our senior developers and in a group setting with our more junior engineers. We aim for our internships to build on what you already know while challenging you to grow toward the next step on your career path.

During your internship, you will:

- Work with product managers and other engineers in order to help define the technical details of customer-driven product features.
- Collaborate with other software developers in a team-oriented environment.
- Learn how to make your code run efficiently on a resource-constrained computational system that must share processing time with other algorithms.
- Test and debug your code and features so that you are proud of what will be tested by the SQA team, and work with them to make your features ready for customer use.

What we're looking for:

- Proficiency in C or C++.
- Comfort developing in a Linux environment; Python or Bash scripting a plus.
- Desire to develop with the end-user in mind.
- Co-worker & customer empathy.

What we offer:

- **Option to Work Remotely:** We practice what we preach. Employees work at our Boston HQ, across the US, and often work a hybrid mix of in-office and remote.
- **Flexible Schedule:** We all work hard, so we believe in working whenever you're at your best.
- **Celebrate Inclusivity:** Owlars get important holidays, including International Women's Day, Indigenous People's Day, and MLK Day.
- **Incredible Team:** Learn alongside phenomenal folks from some of Boston's most successful tech companies

Owl Labs is an Equal Opportunity Employer committed to our values of embracing inclusivity and creating a culture where everyone feels respected and connected, no matter the location of their work environment. We invite applications from people of all walks of life and are committed to providing reasonable accommodations for candidates with disabilities in our recruiting process. If you need accommodations due to a disability, please let us know.
