

Liberty Mutual – Secure DevOps Infrastructure Engineer

About Liberty Mutual Insurance:

At Liberty Mutual, our purpose is to help people embrace today and confidently pursue tomorrow. That's why we provide an environment focused on openness, inclusion, trust and respect. Here, you'll discover a workplace where you can turn your interests into a rewarding career.

We're proudly recognized as a "Great Place to Work" by Great Place to Work® US and as one of America's Best Employers for New Graduates by Forbes, among others. We value your hard work and dedication to making things better and offer benefits that support your well-being. Our focus on doing good extends to our community - we're committed to being environmentally conscious and a force for social good, at the highest standard of governance.

As an intern in our TechStart Internship Program, you'll work side-by-side with our tech teams in a collaborative, diverse, and agile environment that is focused on driving change at Liberty Mutual.

About the Role:

Data is the new oil! This is an exciting opportunity to work as an Infrastructure Engineer on our Data Services team! Our team supports many of our enterprise data management tools, which are used by fellow engineers, data scientists, analysts, and core business users. Data is critical to our business and our team is responsible for building out and maintaining the data management products used to wrangle, transform and analyze it into a format that allows for business decisions to be made. Our products support data science, analytics, reporting, BI, data governance, and ETL functions. Our product suite consists of 20 different products, including: Informatica suite, SAS, Tableau and more.

We are looking for someone that is hungry to learn, eager to grow and enjoys working on a strong, high-productivity team. As an intern, you would be a full team member, working to drive forward our highest priority initiatives. Our team members are spread across the country and function well in a virtual/remote working environment. We are an Agile team that likes to work hard, explore new technologies, and have fun. We practice mob/pair programming daily, with all new team members aligned to mentors within the squad to help with onboarding, skill development and career guidance.

Our team is group of infrastructure engineers that work with our market partners to build out infrastructure for new data products that we purchase.

The team is currently working on building out new products to run in AWS and Azure. The team spends most of their time working in AWS and building out CloudFormation templates. This team is also on the bleeding edge of the tech here at liberty and are often achieving many 'firsts' within the company. Our team is also highly focused on automating the maintenance and operational aspects of the tools we support, which allows our teams to focus on building new.

We use a mix of tools: AWS, Ansible, Python, Azure, CI/CD pipelines, AWS CloudFormation Templates, Lambdas, Bamboo, Git, Docker, Kubernetes

* Please note that you are not expected to know all of these technologies. We offer self-paced and on the job training opportunities as part of our onboarding process.

Qualifications:

- You're working towards a bachelor's degree in a technical discipline or equivalent training and certifications
- You have a proven track record of academic success
- You are fully authorized to work in the U.S. without restrictions
- You are familiar with various IT concepts, strategies, and methodologies
- You have a general knowledge of design and development tools
- You're fluent with at least one or more software development languages, preferably Java
- You are passionate about learning and growing your technical skill set

Benefits:

- This internship is a part of our TechStart Internship Program, a robust network of over 180 interns joining our technology teams across the country. The TechStart Internship will offer you:
 - 1:1 feedback from your manager
 - Dedicated TechStart Intern Mentor that is assigned as a career resource
 - Full access to internal training platforms such as Pluralsight, LinkedIn Learning and O'Reilly
 - Opportunities to participate in intern programming and events including orientation, networking sessions, webinars and an intern hackathon!
- Hourly Rate: \$24-32/hr, paid bi-weekly
- Paid holidays, and paid time off
- Opportunities for full time employment and/or returning for a second internship
- Interns start around June 7th and are expected to intern for at least 10 weeks

Location: Virtual
