

Liberty Mutual – GRS Claims Software Engineering Intern

About Liberty Mutual Insurance:

At Liberty Mutual, our purpose is to help people embrace today and confidently pursue tomorrow. That's why we provide an environment focused on openness, inclusion, trust and respect. Here, you'll discover a workplace where you can turn your interests into a rewarding career.

We're proudly recognized as a "Great Place to Work" by Great Place to Work® US and as one of America's Best Employers for New Graduates by Forbes, among others. We value your hard work and dedication to making things better and offer benefits that support your well-being. Our focus on doing good extends to our community - we're committed to being environmentally conscious and a force for social good, at the highest standard of governance.

As an intern in our TechStart Internship Program, you'll work side-by-side with our tech teams in a collaborative, diverse, and agile environment that is focused on driving change at Liberty Mutual.

Ready to join us?

About the Role:

This role takes place on an Agile development team. We are looking for someone who is passionate about software development.

The Scrum DMC Team is an Agile squad that owns integrations within the Managed Care space of Workers Compensation claims. They are actively working to rewrite current Java integrations into Python /Java Lambdas, utilizing numerous cloud technologies including SpringBoot, step functions, Dynamo DB and SQS Queues. The team is comprised of 6 software engineers, a test engineer, Scrum Master and Product Owner. They have been actively participating in the Agile evolution and are a mature Agile team.

We use a mix of tools: AWS Cloud based technology, REST and SOAP API's, Java, Node, Spring, Git, Bamboo, WAS, IntelliJ, VS Code, Bitbucket

* Please note that you are not expected to know all of these technologies. We offer self-paced and on the job training opportunities as part of our onboarding process.

Qualifications:

- You're working towards a bachelor's degree in a technical discipline or equivalent training and certifications
- You have a proven track record of academic success
- You are fully authorized to work in the U.S. without restrictions
- You are familiar with various IT concepts, strategies, and methodologies
- You have a general knowledge of design and development tools
- You're fluent with at least one or more software development languages, preferably Java
- You are passionate about learning and growing your technical skill set

Benefits:

- This internship is a part of our TechStart Internship Program, a robust network of over 180 interns joining our technology teams across the country. The TechStart Internship will offer you:
 - 1:1 feedback from your manager
 - Dedicated TechStart Intern Mentor that is assigned as a career resource
 - Full access to internal training platforms such as Pluralsight, LinkedIn Learning and O'Reilly
 - Opportunities to participate in intern programming and events including orientation, networking sessions, webinars and an intern hackathon!
- Hourly Rate: \$24-32/hr, paid bi-weekly
- Paid holidays, and paid time off
- Opportunities for full time employment and/or returning for a second internship
- Interns start around June 7th and are expected to intern for at least 10 weeks

Location: Virtual
